

 Peony Grass

- Scientific name: *Aciotis asicanthera*
- Department: Melastomataceae
- Origin: 巴西圣弗兰西 Scott river
- Degree of difficulty:

 Ju marsh grass

- Scientific name: *Acmella repens*
- Department: Asteraceae
- Origin: South America, North America
- Degree of difficulty:

 Angela Yung

- Scientific name: *Aglaonema* sp."Borneo"
- Department: Araceae
- Country of Origin: Indonesia
- Degree of difficulty:

 Raccoon algae

- Scientific name: *Aldrovanda vesiculosa*
- Department: Droseraceae
- Origin: Northern Australia, Eastern Europe, Japan, Northeast China
- Degree of difficulty:

 Red algae raccoon

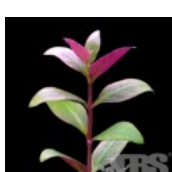

- Scientific name: *Aldrovanda* sp."Australia"
- Department: Droseraceae
- Country of Origin: Australia
- Degree of difficulty:

 Large blood Oncidium

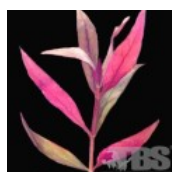

- Scientific name: *Alternanthera lilacina*
- Department: Amaranthaceae
- Origin: tropical regions of South America
- Degree of difficulty:

 Green blood Oncidium

- Scientific name: *Alternanthera ocipus*
- Department: Amaranthaceae
- Origin: Southeast Asia
- Degree of difficulty:

 Blue Blood Heart

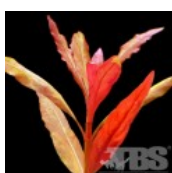

- Scientific name: *Alternanthera reineckii*
- Department: Amaranthaceae
- Origin: tropical regions of South America
- Degree of difficulty:

 Yarra Kyu Asian blood Oncidium

- Scientific name: *Alternanthera reineckii*"araguaia"
- Department: Amaranthaceae
- Origin: Brazil
- Degree of difficulty:

 Cardinals blood Oncidium

- Scientific name: *Alternanthera reineckii*"cardinalis"
- Department: Amaranthaceae
- Origin: improved varieties
- Degree of difficulty:

 Leopard Blue Blood Heart

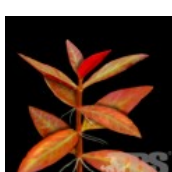

- Scientific name: *Alternanthera reineckii*"variegated form"
- Department: Amaranthaceae
- Origin: improved varieties
- Degree of difficulty:

 Latifolia blood Oncidium

- Scientific name: *Alternanthera rosarfolia*
- Department: Amaranthaceae
- Origin: tropical regions of South America
- Degree of difficulty:

 St. Paul's blood Oncidium

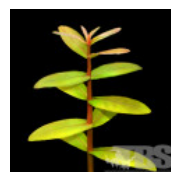

- Scientific name: *Alternanthera* sp."Sao paulo"
- Department: Amaranthaceae
- Origin: Sao Paulo, Brazil
- Degree of difficulty:

 Willow moss

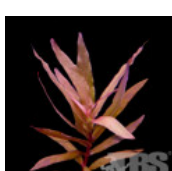

- Scientific name: *Amblystegium serpens*
- Department: Division Amblystegieae
- Origin: Europe, South America, Australia, China, southern Alaska
- Degree of difficulty:

 Long Ye Liu

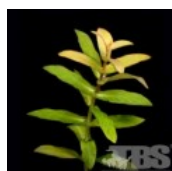

- Scientific Name: *Ammannia coccinea*
- Department: Lythraceae
- Origin: North, Central America
- Degree of difficulty:

 Tamarisk

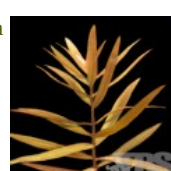

- Scientific Name: *Ammannia gracilis*
- Department: Lythraceae
- Origin: tropical Africa
- Degree of difficulty:

 Aoyagi

- Scientific Name: *Ammannia multiflora*
- Department: Lythraceae
- Origin: Southeast Asia, Japan, China, Taiwan
- Degree of difficulty:

 Butterfly Grass

- Scientific Name: *Ammannia senegalensis*
- Department: Lythraceae
- Origin: tropical Africa
- Degree of difficulty:

 Small tamarisk

- Scientific Name: Ammannia sp.
- Department: Lythraceae
- Origin: South America
- Degree of difficulty: 

 Xi burning

- 
- Scientific Name: Ammannia sp."Sulawesi"
 - Department: Lythraceae
 - Origin: Asia Indonesia
 - Degree of difficulty: 

 Toward the burning

- Scientific Name: Ammannia sp."Sulawesi"
- Department: Lythraceae
- Origin: Asia Indonesia
- Degree of difficulty: 

 Water bamboo

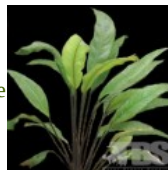

- Scientific name: Aneilema keisak
- Department: Commelinaceae
- Origin: Asia, Australia, North America
- Degree of difficulty: 

 Big bud water bamboo

- Scientific name: Aneilema nudiflorum
- Department: Commelinaceae
- Origin: warm regions of Asia
- Degree of difficulty: 

 Ficus angustifolia steel

- Scientific name: Anubias afzelii
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 芭特 Rong

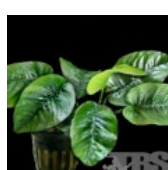

- Scientific name: Anubias barteri
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Broad-leaved fig

- Scientific name: Anubias barteri"broadleaf"
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Butterfly Tree

- Scientific name: Anubias barteri"butterfly"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Marble Tree

- Scientific name: Anubias barteri"marble"
- Department: Araceae
- Origin: West Africa
- Degree of difficulty: 

 Yung lines

- Scientific name: Anubias barteri"stripe"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Wave 叶小榕

- Scientific name: Anubias barteri"wrinkled leaf"
- Department: Araceae
- Origin: West Africa
- Degree of difficulty: 

 Wrinkle Ficus

- Scientific name: Anubias barteri var nana"wrinkle leaf"
- Department: Araceae
- Origin: West Africa
- Degree of difficulty: 

 Huang Rong small heart

- Scientific name: Anubias barteri var nana"yellow heart"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Barbara Yung

- Scientific name: Anubias barteri var. Barteri
- Department: Araceae
- Origin: Nigeria, Cameroon and other West African countries
- Degree of difficulty: 

 Coffee Tree

- Scientific name: Anubias barteri var. Coffeefolia
- Department: Araceae
- Origin: Liberia, Nigeria, Cameroon, Guinea, Jia Peng, Congo
- Degree of difficulty: 

 Ficus bonsai

- Scientific name: Anubias barteri var. Nana"bonsai"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Tabby Rong

- Scientific name: Anubias barteri var. Nana"variegata"
- Department: Araceae
- Origin: West Africa
- Degree of difficulty: 

 White Tree

- Scientific name: Anubias barteri var.nana"albino"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Wing Yung

- Scientific name: Anubias cf pynaertii
- Department: Araceae
- Origin: Congo, Gabon
- Degree of difficulty: 

 吉利榕 leaves

- Scientific name: Anubias gilleti
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Eggs Ficus

- Scientific name: Anubias heterophylla
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Small Tree

- Scientific name: Anubias nana
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Mini Ficus

- Scientific name: Anubias nana"mini"
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Round-leaved fig

- Scientific name: Anubias barteri var.nana"coin leaf"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Gang Rong

- Scientific name: Anubias congensis
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Triangle Tree

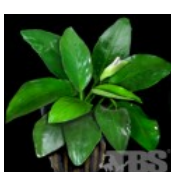

- Scientific name: Anubias gracilis
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Jian Rong

- Scientific name: Anubias lanceolata
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Yung eye

- Scientific name: Anubias nana"eyes"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Stardust small fig

- Scientific name: Anubias nana"star dust"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Kara Jung

- Scientific name: Anubias caladiifolia
- Department: Araceae
- Origin: Nigeria, Cameroon, Guinea
- Degree of difficulty: 

 Yung big swallowtail

- Scientific name: Anubias gigantea
- Department: Araceae
- Origin: West Africa
- Degree of difficulty: 

 Dovetail Rong

- Scientific name: Anubias hastifolia
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Gemini Rong

- Scientific name: Anubias minima
- Department: Araceae
- Origin: tropical regions of West Africa
- Degree of difficulty: 

 Yellow 金小榕

- Scientific name: Anubias nana"golden"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 White small fig

- Scientific name: Anubias nana"variegated"
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Small Tree Pocket

- Scientific name: Anubias petite
- Department: Araceae
- Origin: improved varieties
- Degree of difficulty: 

 Rong Mao

- Scientific name: Anubias pynaertii
- Department: Araceae
- Origin: Congo, Cameroon, Zaire, Gabon
- Degree of difficulty: 

 迪亨 Rong

- Scientific name: Anubias sp."Dehane"
- Department: Araceae
- Origin: Cameroon
- Degree of difficulty: 

 加彭 Rong

- Scientific name: Anubias sp."Gabon"
- Department: Araceae
- Country of Origin: Republic of South West Africa Jiapeng
- Degree of difficulty: 

 Kabbah Rong

- Scientific name: Anubias sp."Kaba"
- Department: Araceae
- Origin: Cameroon
- Degree of difficulty: 

 Muyoukarong

- Scientific name: Anubias sp."Muyuka"
- Department: Araceae
- Origin: Cameroon
- Degree of difficulty: 

 Sharp-leaved fig

- Scientific name: Anubias sp."Short & sharp"
- Department: Araceae
- Origin: Southeast Asia
- Degree of difficulty: 

 Jiebaxirong

- Scientific name: Anubias sp."Yabassi"
- Department: Araceae
- Origin: Cameroon
- Degree of difficulty: 

 Bubble grass

- Scientific name: Aponogeton boivinianus
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: northeast of Madagascar
- Degree of difficulty: 

 Vesicles grass waves

- Scientific name: Aponogeton bullosus
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Australia
- Degree of difficulty: 

 Large curling grass

- Scientific name: Aponogeton capuroni
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Southeast Madagascar
- Degree of difficulty: 

 Aberdeen grass sub-

- Scientific name: Aponogeton cf monostrachyus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: India, Sri Lanka
- Degree of difficulty: 

 Long grass crepe side sclerophyll

- Scientific name: Aponogeton crispus × rigidifolius
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: artificial hybrids
- Degree of difficulty: 

 Crepe side of grass

- Scientific name: Aponogeton crispus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: India, Sri Lanka
- Degree of difficulty: 

 Purple grass waves

- Scientific name: Aponogeton crispus"red".
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: improved taste
- Degree of difficulty: 

 Wedge-shaped perianth grass waves

- Scientific name: Aponogeton cuneatus
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Australia
- Degree of difficulty: 

 Grass Wave

- Scientific name: Aponogeton echinatus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: India central and southern

 Aron Long grass

- Scientific name: Aponogeton elongatus
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Australia
- Degree of difficulty: 

Australian Red grass waves

- Scientific name: Aponogeton eurypermus
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Australia
- Degree of difficulty:

Jackson Long grass

- Scientific name: Aponogeton jacobsonii
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Sri Lanka
- Degree of difficulty:

Dayton Long grass

- Scientific name: Aponogeton natans
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: India, Sri Lanka
- Degree of difficulty:

Suipaolangcao

- Scientific name: Aponogeton stachyosporus
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Malaysia
- Degree of difficulty:

Big Wave grass

- Scientific name: Aponogeton ulvaceus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Madagascar
- Degree of difficulty:

• Degree of difficulty:

Narrow grass leaves network

- Scientific name: Aponogeton guillotii
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Madagascar
- Degree of difficulty:

Long ruffled the grass

- Scientific name: Aponogeton longiplumulosus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: tropical regions of East Africa
- Degree of difficulty:

Long grass sclerophyll

- Scientific name: Aponogeton rigidifolius
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Sri Lanka
- Degree of difficulty:

Tiannulangcao

- Scientific name: Aponogeton tenuispicatus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Madagascar
- Degree of difficulty:

Kelp grass

- Scientific name: Aponogeton undulatus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: India to Malaysia area
- Degree of difficulty:

Heienwangcao

- Scientific name: Aponogeton henkelianus
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Madagascar
- Degree of difficulty:

Net grass

- Scientific name: Aponogeton madagascarensis
- Department: Water Department Aponogetonaceae Ipomoea
- Origin: Madagascar
- Degree of difficulty:

Robinson grass waves

- Scientific name: Aponogeton robinsonii
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Vietnam
- Degree of difficulty:

Du Fu Long grass

- Scientific name: Aponogeton tofus
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Australia
- Degree of difficulty:

Purple grass waves in Australia

- Scientific name: Aponogeton vanbruggenii
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: Australia
- Degree of difficulty:

Kutanade grass waves

- Scientific *name*: Aponogeton sp."Kuttanad"
- Department: Water Department Aponogetonaceae Ipomoea
- Country of Origin: India
- Degree of difficulty: ★★☆☆☆☆

Purple Bubble

- Scientific *name*: Arthraxon hispidus
- Department: Gramineae Gramineae
- Country of Origin: Malaysia
- Degree of difficulty: ★★☆☆☆☆

Gallant

- Scientific *name*: Arthraxon hispidus
- Department: Gramineae Gramineae
- Origin: Asia
- Degree of difficulty: ★★☆☆☆☆

 Tulip

- Scientific name: Arthraxon sp.
- Department: Gramineae
- Country of Origin: Malaysia
- Degree of difficulty: 

 Bubble Bobble

- Scientific name: Arthraxon sp.
- Department: Gramineae
- Country of Origin: Malaysia
- Degree of difficulty: 

 Spider fern

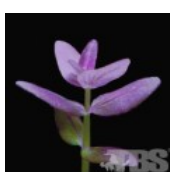

- Scientific name: Asplenium ruprechtii
- Department: Aspleniaceae
- Origin: Hokkaido, Japan, Korea, northeast China, Russia
- Degree of difficulty: 

 American tiger ears

- Scientific name: Bacopa amplexicaulis
- Department: front growing woody Plantaginaceae
- Origin: Central America and southern
- Degree of difficulty: 

 Purple tiger ears

- Scientific name: Bacopa araguaia
- Department: front growing woody Plantaginaceae
- Origin: Brazil
- Degree of difficulty: 

 Yarra Kyu Asian tiger ear

- Scientific name: Bacopa araguaia var. Araguaia
- Department: front growing woody Plantaginaceae
- Origin: South America, Brazil, Araguaia River
- Degree of difficulty: 

 Brazil tiger ears

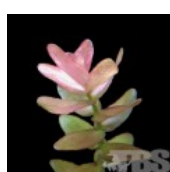

- Scientific name: Bacopa australis
- Department: front growing woody Plantaginaceae
- Origin: South America Brazil
- Degree of difficulty: 

 Tiger ears

- Scientific name: Bacopa caroliniana
- Department: front growing woody Plantaginaceae
- Origin: North America, South America, South America
- Degree of difficulty: 

 Pink tiger ears

- Scientific name: Bacopa clorata
- Department: front growing woody Plantaginaceae
- Origin: South America
- Degree of difficulty: 

 More seed on the leaf

- Scientific name: Bacopa crenata
- Department: front growing woody Plantaginaceae
- Origin: West Africa
- Degree of difficulty: 

 Big tiger ears

- Scientific name: Bacopa lanigera
- Department: front growing woody Plantaginaceae
- Origin: Brazil
- Degree of difficulty: 

 Serrated on the leaf

- Scientific name: Bacopa madagascariensis
- Department: front growing woody Plantaginaceae
- Origin: Madagascar
- Degree of difficulty: 

 Of leaf

- Scientific name: Bacopa monnieri
- Department: front growing woody Plantaginaceae
- Origin: Africa, Asia, Australia, United States
- Degree of difficulty: 

 Coniferous tiger ears

- Scientific name: Bacopa myriophylloides
- Department: front growing woody Plantaginaceae
- Country of Origin: China, after the King
- Degree of difficulty: 

 Panda Nuo tiger ears

- Scientific name: Bacopa pantanal
- Department: front growing woody Plantaginaceae
- Origin: South America Pantanal region of Brazil
- Degree of difficulty: 

 Leaves tiger ears

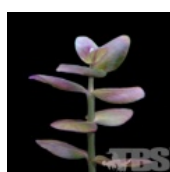

- Scientific name: Bacopa roraima
- Department: front growing woody Plantaginaceae
- Origin: South America Brazil Roraima State
- Degree of difficulty: 

 Rotundifolia tiger ears

- Scientific name: Bacopa rotundifolia
- Department: front growing woody Plantaginaceae
- Origin: North America, Japan
- Degree of difficulty: 

 Rainbow tiger ears

- Scientific name: Bacopa salzmannii
- Department: front growing woody Plantaginaceae
- Origin: South America
- Degree of difficulty: 

 Ear leaf tooth tiger

- Scientific name: Bacopa sp.
- Department: front growing woody Plantaginaceae
- Origin: South America
- Degree of difficulty: 

 Leaf tiger ears

- Scientific name: Bacopa sp."Araguaia"
- Department: front growing woody Plantaginaceae
- Origin: South America, Brazil, Araguaia River
- Degree of difficulty: 

 Egg Ye Hu ear

- Scientific name: Bacopa sp."Araguaia"
- Department: front growing woody Plantaginaceae
- Origin: South America, Brazil, Araguaia River
- Degree of difficulty: 

 Japanese tiger ears

- Scientific name: Bacopa sp."Japan"
- Department: front growing woody Plantaginaceae
- Origin: Japan (?)
- Degree of difficulty: 

 New tiger ears

- Scientific name: Bacopa sp."Mato grosso"
- Department: front growing woody Plantaginaceae
- Origin: Brazil
- Degree of difficulty: 

 Twisted mouth Mosi

- Scientific name: Barbula sp.
- Divisions: large cap Musci Encalyptaceae
- Country of Origin: China
- Degree of difficulty: 

 Red seaweed

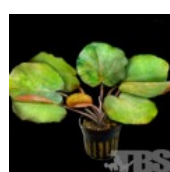

- Scientific name: Barclaya longifolia
- Department: Nymphaeaceae Nymphaeaceae
- Origin: Myanmar, Thailand, Indochina
- Degree of difficulty: 

 Purple Butterfly

- Scientific name: Barclaya motleyi
- Department: Nymphaeaceae Nymphaeaceae
- Origin: Sumatra, Malaysia, Borneo (Sarawak)
- Degree of difficulty: 

 Round lotus leaves Geban

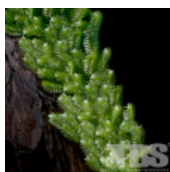

- Scientific name: Barclaya rotundifolia
- Department: Nymphaeaceae Nymphaeaceae
- Country of Origin: Malaysia
- Degree of difficulty: 

 Lishuozhuxian

- Scientific Name: Bartramia pomiformis
- Department: Pearl Musci Bartramiaceae
- Origin: Northern Hemisphere, including Japan, Taiwan, southern China
- Degree of difficulty: 

 Trifid whip moss

- Scientific name: Bazzania tridens
- Department: means the leaves Musci Lepidoziaceae
- Origin: Southeast Asia, Japan, Taiwan, southern China
- Degree of difficulty: 

 Long stem Ze algae

- Scientific name: Blyxa alternifolia
- Department: Hydrocharitaceae Hydrocharitaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 Algae in Ze

- Scientific name: Blyxa aubertii
- Department: Hydrocharitaceae Hydrocharitaceae
- Origin: Southeast Asia, India, Madagascar
- Degree of difficulty: 

 Large Ze algae

- Scientific name: Blyxa echinosperma
- Department: Hydrocharitaceae Hydrocharitaceae
- Origin: India, Indonesia
- Degree of difficulty: 

 Japan Ze algae

- Scientific name: Blyxa japonica
- Department: Hydrocharitaceae Hydrocharitaceae
- Origin: Japan, Korea, Taiwan, Indonesia, Bangladesh
- Degree of difficulty: 

 Smooth Ze algae

- Scientific name: Blyxa leioperma
- Department: Hydrocharitaceae Hydrocharitaceae
- Country of Origin: China, Japan, Taiwan
- Degree of difficulty: 

 Ze algae

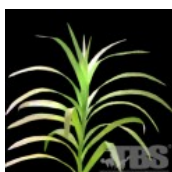

- Scientific name: Blyxa novoguineensis
- Department: Hydrocharitaceae Hydrocharitaceae
- Origin: New Guinea
- Degree of difficulty: 

 Vietnam basketful algae

- Scientific name: Blyxa vietii
- Department: Hydrocharitaceae Hydrocharitaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 India Ze algae

- Scientific name: Blyxa sp."India"
- Department: Hydrocharitaceae
- Origin: India, Sri Lanka
- Degree of difficulty: 

 Ze red algae

- Scientific name: Blyxa sp."Roban"
- Department: Hydrocharitaceae
- Country of Origin: Malaysia
- Degree of difficulty: 

 Australia Ze algae

- Scientific name: Blyxa sp."Australia"
- Department: Hydrocharitaceae
- Country of Origin: Australia
- Degree of difficulty: 

 Bei Shaer clover fern

- Scientific name: Bolbitis cf, heteroclita"besar"
- Department: Division Bolbitidaceae real fern
- Origin: Borneo
- Degree of difficulty: 

 Cambodia clover fern

- Scientific name: Bolbitis cf, heteroclita"campodia"
- Department: Division Bolbitidaceae real fern
- Origin: Cambodia
- Degree of difficulty: 

 Malaysia clover fern

- Scientific name: Bolbitis cf, heteroclita"malaysia"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Malaysia
- Degree of difficulty: 

 Penang clover fern

- Scientific name: Bolbitis cf, heteroclita"penang"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Malaysia
- Degree of difficulty: 

 Thailand clover fern

- Scientific name: Bolbitis cf, heteroclita"thailand"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Thailand
- Degree of difficulty: 

 Madagascar black wood fern

- Scientific name: Bolbitis cf, heudelotii"madagascar"
- Department: Division Bolbitidaceae real fern
- Origin: Motor Vegas
- Degree of difficulty: 

 Guinea Zoysia black wood fern

- Scientific name: Bolbitis cf, Heudelotii"guinea"(type II)
- Department: Division Bolbitidaceae real fern
- Origin: Guinea, West Africa
- Degree of difficulty: 

 Guinea black wood fern

- Scientific name: Bolbitis cf, Heudelotii"guinea"(type I)
- Department: Division Bolbitidaceae real fern
- Origin: Guinea, West Africa
- Degree of difficulty: 

 Clover fern

- Scientific name: Bolbitis heteroclita
- Department: Division Bolbitidaceae real fern
- Origin: Southeast Asia
- Degree of difficulty: 

 Black wood fern

- Scientific name: Bolbitis heudelotii
- Department: Division Bolbitidaceae real fern
- Origin: tropical Africa
- Degree of difficulty: 

 Bali dark wood fern

- Scientific name: Bolbitis sp,"bali"
- Department: Division Bolbitidaceae real fern
- Origin: Indonesia Bali
- Degree of difficulty: 

 Baxiangshijue

- Scientific name: Bolbitis sp."Bahang"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Malaysia
- Degree of difficulty: 

 Bei Shaer black wood fern (I type)

- Scientific name: Bolbitis sp."Besar"(type I)
- Department: Division Bolbitidaceae real fern
- Origin: Borneo
- Degree of difficulty: 

 Bei Shaer black wood fern (II)

- Scientific name: Bolbitis sp."Besar"(type II)
- Department: Division Bolbitidaceae real fern
- Origin: Borneo
- Degree of difficulty: 

 Bei Shaer black wood fern (III)

- Scientific name: Bolbitis sp."Besar"(type III)
- Department: Division Bolbitidaceae real fern
- Origin: Borneo
- Degree of difficulty: 

 Borneo real fern

- Scientific name: Bolbitis sp."Borneo"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Malaysia
- Degree of difficulty:

 Branco black wood fern

- Scientific name: Bolbitis sp."Branco"
- Department: Division Bolbitidaceae real fern
- Origin: Peru
- Degree of difficulty:

 Cameroon real fern

- Scientific name: Bolbitis sp."Cameroon"
- Department: Division Bolbitidaceae real fern
- Origin: Africa Maika Long
- Degree of difficulty:

 Cameroon dark wood fern

- Scientific name: Bolbitis sp."Cameroon"
- Department: Division Bolbitidaceae real fern
- Origin: Africa Maika Long
- Degree of difficulty:

 Chiang Mai dark wood fern

- Scientific name: Bolbitis sp."Chiang mai"
- Department: Division Bolbitidaceae real fern
- Origin: Chiang Mai, Thailand
- Degree of difficulty:

 Kanchanaburi real fern

- Scientific name: Bolbitis sp."Kanchanaburi"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Thailand
- Degree of difficulty:

 Fighter Patong Beach real fern

- Scientific name: Bolbitis sp."Kidapawan"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Philippines
- Degree of difficulty:

 Xue Mead real fern

- Scientific name: Bolbitis sp."Midsayap"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Philippines
- Degree of difficulty:

 Philippines dark wood fern

- Scientific name: Bolbitis sp."Philippine"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Philippines
- Degree of difficulty:

 Fern in fact still Kawen

- Scientific name: Bolbitis sp."Sangkhlaburi"
- Department: Division Bolbitidaceae real fern
- Country of Origin: Thailand
- Degree of difficulty:

 Celery leaves dark wood fern

- Scientific name: Bolbitis sp."Baby leaf"
- Department: Division Bolbitidaceae real fern
- Origin: South America
- Degree of difficulty:

 Jade beads moss

- Scientific Name: Bryum capillare
- Department: Division Bryaceae real fur
- Origin: Worldwide
- Degree of difficulty:

 Yung Mott pepper

- Scientific name: Bucephalandra motleyana
- Department: Araceae
- Country of Origin: Malaysia
- Degree of difficulty:

 Yung Mott pepper (Bada Wang products)

- Scientific name: Bucephalandra motleyana"padawan"
- Department: Araceae
- Country of Origin: Malaysia Sarawak
- Degree of difficulty:

 Yung Mott pepper (west production)

- Scientific name: Bucephalandra motleyana"serian"
- Department: Araceae
- Country of Origin: Malaysia Sarawak
- Degree of difficulty:

 Cards Olympus pepper Yung Yo La

- Scientific name: Bucephalandra sp. "Kayu lapis"
- Department: Araceae
- Origin: Indonesia, West Borneo
- Degree of difficulty:

 Keda Ga Pepper Tree (1)

- Scientific name: Bucephalandra sp."Kedagang (1)"
- Department: Araceae
- Origin: Indonesia Central Borneo
- Degree of difficulty:

 Keda Ga Pepper Tree (2)

- Scientific name: Bucephalandra sp."Kedagang (2)"
- Department: Araceae
- Origin: Indonesia Central Borneo
- Degree of difficulty:

 Keda Ga Pepper Tree (3)

- Scientific name: Bucephalandra sp."Kedagang (3)"
- Department: Araceae
- Origin: Indonesia Central Borneo
- Degree of difficulty: 

 Keda Ga Pepper Tree (5)

- Scientific name: Bucephalandra sp."Kedagang (5)"
- Department: Araceae
- Origin: Indonesia Central Borneo
- Degree of difficulty: 

 Kulakuya Pepper Tree (1)

- Scientific name: Bucephalandra sp."Kualakuayan (1)"
- Department: Araceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 Kulakuya Pepper Tree (2)

- Scientific name: Bucephalandra sp."Kualakuayan (2)"
- Department: Araceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 High pepper Yung Sang

- Scientific name: Bucephalandra sp."Sanggau"
- Department: Araceae
- Origin: Indonesia, West Borneo
- Degree of difficulty: 

 Fonseca said Pepper Tree (1)

- Scientific name: Bucephalandra sp."Sekadau (1)"
- Department: Araceae
- Origin: Indonesia, West Borneo
- Degree of difficulty: 

 Fonseca said Pepper Tree (2)

- Scientific name: Bucephalandra sp."Sekadau (2)"
- Department: Araceae
- Origin: Indonesia, West Borneo
- Degree of difficulty: 

 Fonseca said Pepper Tree (3)

- Scientific name: Bucephalandra sp."Sekadau (3)"
- Department: Araceae
- Origin: Indonesia, West Borneo
- Degree of difficulty: 

 New dang chili Yung (1)

- Scientific name: Bucephalandra sp."Sintang (1)"
- Department: Araceae
- Origin: Indonesia, West Borneo
- Degree of difficulty: 

 New dang chili Yung (2)

- Scientific name: Bucephalandra sp."Sintang (2)"
- Department: Araceae
- Origin: Indonesia, West Borneo
- Degree of difficulty: 

 Pepper Tree West Kalimantan (1)

- Scientific name: Bucephalandra sp."West kalimantan"
- Department: Araceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 Pepper Tree West Kalimantan (3)

- Scientific name: Bucephalandra sp."West kalimantan (3)"
- Department: Araceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 Pepper Tree West Kalimantan (4)

- Scientific name: Bucephalandra sp."West kalimantan (4)"
- Department: Araceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 Huang flowers

- Scientific Name: Cabomba aquatica
- Department: Po Branch Cabombaceae
- Origin: Guyana, Brazil, the Amazon River Basin
- Degree of difficulty: 

 Daisy grass

- Scientific name: Cabomba caroliniana
- Department: Po Branch Cabombaceae
- Origin: North America, southern, northern South America
- Degree of difficulty: 

 Silver leaf daisy grass

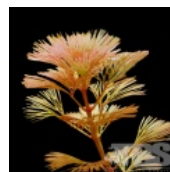

- Scientific name: *Cabomba caroliniana* var.
- Department: Po Branch Cabombaceae
- Origin: improved varieties
- Degree of difficulty:

 Red daisy grass

- Scientific name: *Cabomba furcata*
- Department: Po Branch Cabombaceae
- Origin: Central and South America
- Degree of difficulty:

 Orange daisy grass

- Scientific name: *Cabomba piauihyensis*
- Department: Brasenia Division Cabombaceae
- Origin: Central and South America
- Degree of difficulty:

 Marsh raw horse teeth

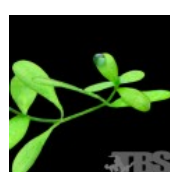

- Scientific name: *Callitriche palustris*
- Department: Water Horse Dental Callitrichaceae
- Origin: Europe, North America and temperate Asia
- Degree of difficulty:

 Water horse teeth

- Scientific name: *Callitriche verna*
- Department: Water Horse Dental Callitrichaceae
- Origin: Northern Hemisphere, Southern Hemisphere and New Zealand, Australia
- Degree of difficulty:

 South American Water Horse teeth

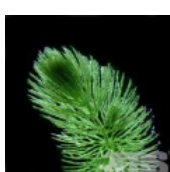

- Scientific name: *Callitriche* sp."Sao paulo"
- Department: Water Horse Dental Callitrichaceae
- Origin: Sao Paulo, Brazil
- Degree of difficulty:

 Apple grass

- Scientific name: *Cardamine lyrata*
- Department: Cruciferae Cruciferae
- Origin: eastern Siberia, eastern and northern China, Japan, South Korea
- Degree of difficulty:

 Hornwort

- Scientific name: *Ceratophyllum demersum*
- Department: Ceratophyllum Section Ceratophyllaceae
- Origin: Worldwide
- Degree of difficulty:

 Red hornwort

- Scientific name: *Ceratophyllum demersum* var. *Demersum*
- Department: Ceratophyllum Section Ceratophyllaceae
- Origin: Myanmar
- Degree of difficulty:

 Daikin *Ceratophyllum demersum*

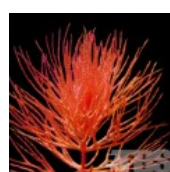

- Scientific name: *Ceratophyllum submersum*
- Department: Ceratophyllum Section Ceratophyllaceae
- Origin: Worldwide
- Degree of difficulty:

 Fire Dragon green algae

- Scientific name: *Ceratophyllum* sp.
- Department: Ceratophyllum Section Ceratophyllaceae
- Country of Origin: UK
- Degree of difficulty:

 Dragon algae

- Scientific name: *Ceratophyllum* sp."Peru"
- Department: Ceratophyllum Section Ceratophyllaceae
- Origin: Peru
- Degree of difficulty:

 Big-leaf parsley

- Scientific name: *Ceratopteris cornuta*
- Department: Division Parkeriaceae water fern
- Origin: United States, Australia and Southeast Asia
- Degree of difficulty:

 Dense leaf cress

- Scientific name: *Ceratopteris siliquosa*
- Department: Division Parkeriaceae water fern
- Origin: World moist warm areas
- Degree of difficulty:

 Egeria cress

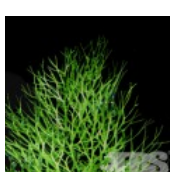

- Scientific name: *Ceratopteris thalictroides*
- Department: Division Parkeriaceae water fern
- Origin: Africa and tropical regions of northern Australia
- Degree of difficulty:

 Vietnam cress

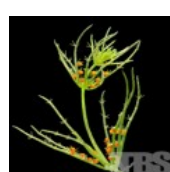

- Scientific name: *Ceratopteris thalictroides*"Vietnam"
- Department: Division Parkeriaceae water fern
- Country of Origin: Vietnam
- Degree of difficulty:

 Coniferous cress

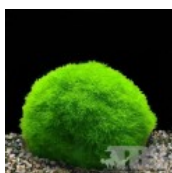

- Scientific name: *Ceratopteris* sp."Laos"
- Department: Division Parkeriaceae water fern
- Country of Origin: Laos
- Degree of difficulty:

 Vietnam strawberries

- Scientific name: *Chara* sp."Vietnam"
- Department: Division Characeae Chara
- Country of Origin: Vietnam
- Degree of difficulty:

 **Green algae ball**

- Scientific name: *Cladophora aegagrophila*
- Department: Division Cladophoraceae Cladophora
- Origin: Asia and Europe
- Degree of difficulty: 

 **Palm Mosi**

- Scientific name: *Climacium japonicum*
- Department: years Musci Climaciaceae
- Origin: East Asia, North America
- Degree of difficulty: 

 **Commelina**

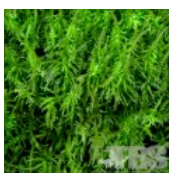

- Scientific name: *Commelina communis L.*
- Department: Commelinaceae Commelinaceae
- Origin: mainly in tropical, subtropical humid region in a small number of distribution
- Degree of difficulty: 

 **Meat woodruff**

- Scientific name: *Crassula helmsii*
- Department: Crassulaceae Crassulaceae
- Origin: Australia, Europe
- Degree of difficulty: 

 **Moss horn**

- Scientific name: *Cratoneuron filicinum*
- Department: Division Amblystegiaceae willow moss
- Origin: Worldwide
- Degree of difficulty: 

 **Aoba wood fern**

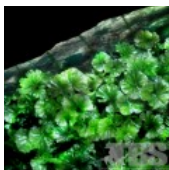

- Scientific name: *Crepidomanes auriculatum*
- Department: Division Hymenophyllaceae film fern
- Origin: Japan, Okinawa, Taiwan, South China, Southeast Asia
- Degree of difficulty: 

 **Thick edge fern**

- Scientific name: *Crepidomanes humile*
- Department: Division Hymenophyllaceae film fern
- Country of Origin: Taiwan, Okinawa
- Degree of difficulty: 

 **Round fan fern**

- Scientific name: *Crepidomanes minutum*
- Department: Division Hymenophyllaceae film fern
- Origin: in many parts of the world
- Degree of difficulty: 

 **The fountain**

- Scientific name: *Crinum aquatica*
- Department: Amaryllidaceae Amaryllidaceae
- Origin: West Africa, tropical waters
- Degree of difficulty: 

 **Small fountain**

- Scientific name: *Crinum calamistratum*
- Department: Amaryllidaceae Amaryllidaceae
- Origin: West Africa, tropical waters
- Degree of difficulty: 

 **Large fountain**

- Scientific name: *Crinum natans*
- Department: Amaryllidaceae Amaryllidaceae
- Origin: West Africa, tropical waters
- Degree of difficulty: 

 **Brazilian water garlic**

- Scientific name: *Crinum purpurascens*
- Department: Amaryllidaceae Amaryllidaceae
- Origin: Brazil
- Degree of difficulty: 

 **Thai garlic water**

- Scientific name: *Crinum thaianum*
- Department: Amaryllidaceae Amaryllidaceae
- Country of Origin: Thailand
- Degree of difficulty: 

 **Cameroon water garlic**

- Scientific name: *Crinum sp. "Cameroon"*
- Department: Amaryllidaceae Amaryllidaceae
- Origin: Cameroon
- Degree of difficulty: 

 **Yafei pepper grass**

Echinodorus *scaber*
- Department: Alismataceae
Alismataceae
- Origin: Venezuela, Argentina
- Degree of difficulty:
☆☆☆☆

 Leopard elephant ears

- Scientific name: Echinodorus schlueteri "leopard"
- Divisions: Alismaceae
- Origin: artificial modified
- Degree of difficulty:

 Sabah Crown Grass

- Scientific name: Echinodorus subalatus
- Department: Alismataceae
- Origin: Central and South America
- Degree of difficulty:

 Latifolia coniferous crown

- Scientific name: Echinodorus tenellus "broad leaves"
- Department: Alismataceae
- Origin: improved varieties
- Degree of difficulty:

 Crown grass spit ni

- Scientific name: Echinodorus tunicatus
- Department: Alismataceae
- Origin: Costa Rica, Colombia, Ecuador, Peru, Panama
- Degree of difficulty:

 Cameroon grass crown

- Scientific name: Echinodorus veronikae
- Department: Alismataceae
- Origin: Cameroon
- Degree of difficulty:

 True red crown grass

- Scientific name: Echinodorus sp. "Real red"
- Department: Alismataceae
- Origin: Uruguay
- Degree of difficulty:

 Bear Grass Crown

- Scientific name: Echinodorus small bear
- Department: Alismataceae
- Origin: improved varieties
- Degree of difficulty:

 Tan is still crown grass

- Scientific name: Echinodorus tanzende feuerfeder
- Department: Alismataceae
- Origin: improved varieties
- Degree of difficulty:

 Three-color crown grass

- Scientific name: Echinodorus tricolor
- Department: Alismataceae
- Origin: improved varieties
- Degree of difficulty:

 Long 叶九宫

- Scientific name: Echinodorus uruguayensis
- Department: Alismataceae
- Origin: Nan Baxi, Uruguay, Argentina, Chile
- Degree of difficulty:

 Screw crown grass

- Scientific name: Echinodorus vesuvius
- Department: Alismataceae
- Origin: South America
- Degree of difficulty:

 Umbrella sedge

- Scientific name: Egleria fluctans
- Department: Cyperaceae
- Origin: Brazil, Venezuela
- Degree of difficulty:

 Crown grass spider

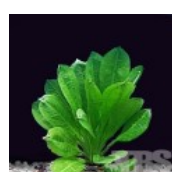

- Scientific name: Echinodorus spidernet
- Department: Alismataceae
- Origin: improved varieties
- Degree of difficulty:

 Coniferous crown grass

- Scientific name: Echinodorus tenellus
- Department: Alismataceae
- Origin: North America South America
- Degree of difficulty:

 Green Grass Crown

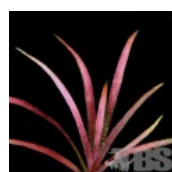

- Scientific name: Echinodorus tropica
- Department: Alismataceae
- Origin: artificial modified
- Degree of difficulty:

 Low growth Ye Jiuguan

- Scientific name: Echinodorus uruguayensis "minor"
- Department: Alismataceae
- Origin: Brazil
- Degree of difficulty:

 Crown grass red needles

- Scientific name: Echinodorus sp.
- Department: Alismataceae
- Origin: South America
- Degree of difficulty:

 Long grass Ike

- Scientific name: Eichhornia azurea
- Department: Division Pontederiaceae
- Origin: South America
- Degree of difficulty:

 South American grass Ike

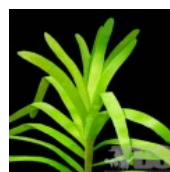

- Scientific name: *Eichhornia diversifolia*
- Department: Division Pontederiaceae rain for a long time to spend
- Origin: South America
- Degree of difficulty: 

 Red grass stems Ike

- Scientific name: *Eichhornia heterosperma*
- Department: Division Pontederiaceae rain for a long time to spend
- Country of Origin: United States Costa Rica, Guyana, South America
- Degree of difficulty: 

 Ike grass Africa

- Scientific name: *Eichhornia natans*
- Department: Division Pontederiaceae rain for a long time to spend
- Origin: West Africa
- Degree of difficulty: 

 Nigeria Ike grass

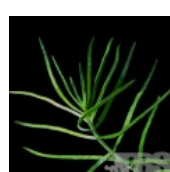

- Scientific name: *Eichhornia* sp."Nigeria"
- Department: Division Pontederiaceae rain for a long time to spend
- Origin: West Africa Nigeria (Nigeria)
- Degree of difficulty: 

 罗赖马艾克 grass

- Scientific name: *Eichhornia* sp."Roraima"
- Department: Division Pontederiaceae rain for a long time to spend
- Origin: Brazil
- Degree of difficulty: 

 Americas ditch Stellaria

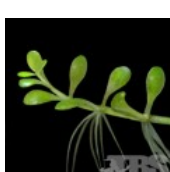

- Scientific name: *Elatine americana*
- Department: Division Elatinaceae ditch Stellaria
- Origin: North America
- Degree of difficulty: 

 Malta ditch Stellaria

- Scientific name: *Elatine gussonei*
- Department: Division Elatinaceae ditch Stellaria
- Origin: Malta (island south of Europe)
- Degree of difficulty: 

 Six core trench Stellaria

- Scientific name: *Elatine hexandra*
- Department: Division Elatinaceae ditch Stellaria
- Origin: Europe
- Degree of difficulty: 

 Horseshoe ditch Stellaria

- Scientific name: *Elatine hydropiper*
- Department: Division Elatinaceae ditch Stellaria
- Origin: Europe, Russia, China
- Degree of difficulty: 

 Stellaria large flower groove

- Scientific name: *Elatine macropoda*
- Department: Division Elatinaceae ditch Stellaria
- Origin: Southern Europe and North Africa
- Degree of difficulty: 

 Stellaria mini trench

- Scientific name: *Elatine minima*
- Department: Division Elatinaceae ditch Stellaria
- Country of Origin: United States
- Degree of difficulty: 

 Japanese pearl grass

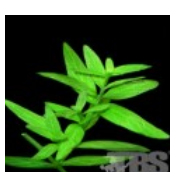

- Scientific name: *Elatine orientalis*
- Department: Division Elatinaceae ditch Stellaria
- Origin: Japan, Asia
- Degree of difficulty: 

 Stellaria ditch

- Scientific name: *Elatine triandra*
- Department: Division Elatinaceae ditch Stellaria
- Country of Origin: Taiwan, Japan, Korea, China, Europe, South America
- Degree of difficulty: 

 India ditch Stellaria

- Scientific name: *Elatine triandra*"ratnagiri"
- Department: Division Elatinaceae ditch Stellaria
- Country of Origin: India
- Degree of difficulty: 

 Small sedge

- Scientific name: *Eleocharis acicularis*
- Department: Cyperaceae Cyperaceae
- Origin: America, Europe, Africa, Asia, Japan
- Degree of difficulty: 

 Daniel felt

- Scientific name: Eleocharis geniculata
- Department: Cyperaceae
- Origin: Tropical and subtropical regions
- Degree of difficulty: 

 Cow blankets

- Scientific name: Eleocharis parvula
- Department: Cyperaceae
- Origin: America, Europe, Africa
- Degree of difficulty: 

 Large sedge

- Scientific name: Eleocharis vivipara
- Department: Cyperaceae
- Origin: North America
- Degree of difficulty: 

 Mini cow blankets

- Scientific name: Eleocharis sp.
- Department: Cyperaceae
- Origin: Denmark
- Degree of difficulty: 

 Shen old sedge

- Scientific name: Eleocharis sp."Xingu"
- Department: Cyperaceae
- Origin: Brazil
- Degree of difficulty: 

 Three water grass Yun

- Scientific Name: Elodea canadensis
- Department: Hydrocharitaceae
- Origin: North America
- Degree of difficulty: 

 Four water grass Yun

- Scientific Name: Elodea densa
- Department: Hydrocharitaceae
- Origin: Argentina, Brazil, Paraguay, Uruguay
- Degree of difficulty: 

 Zoysia Grass Water Yun

- Scientific Name: Elodea najas
- Department: Hydrocharitaceae
- Origin: Brazil, Argentina, Paraguay
- Degree of difficulty: 

 American Water Yun grass

- Scientific Name: Elodea nuttallii
- Department: Hydrocharitaceae
- Origin: North America
- Degree of difficulty: 

 Kirishima refined grains

- Scientific name: Eriocaulon amanoanum"kirishima"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Even calyx Eriocaulon

- Scientific name: Eriocaulon buergerianum
- Department: fine grain growing woody Eriocaulaceae
- Origin: Asia
- Degree of difficulty: 

 Small Eriocaulon

- Scientific name: Eriocaulon cinereum
- Department: fine grain growing woody Eriocaulonaceae
- Origin: tropical to temperate regions of the world
- Degree of difficulty: 

 Kanagawa fine grains

- Scientific name: Eriocaulon cinereum"kanagawa"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Nepal Eriocaulon

- Scientific name: Eriocaulon nepalense
- Department: fine grain growing woody Eriocaulaceae
- Origin: Nepal, Southeast Asia, Taiwan
- Degree of difficulty: 

 Asahi Eriocaulon

- Scientific name: Eriocaulon parvum
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan, Kagoshima, Guangxi, China, Korean Peninsula
- Degree of difficulty: 

 Fans sun

- Scientific name: Eriocaulon setaceum"australia"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Kimberly region of Australia
- Degree of difficulty: 

 Capital letter

- Scientific name: Eriocaulon setaceum"kimberly"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Australia Kimberley region
- Degree of difficulty: 

 Thai fans Sun

- Scientific name: Eriocaulon setaceum"thailand"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Thailand, Indonesia
- Degree of difficulty: 

Big-leaf Eriocaulon

- Scientific name: Eriocaulon sexangulare
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Taiwan, Southeast Asia, mainland China coast, Okinawa, Japan
- Degree of difficulty: ★★★★★

Philippines Eriocaulon

- Scientific name: Eriocaulon truncatum
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Taiwan, Southeast Asia, mainland China coast
- Degree of difficulty: ★★★★★

Africa Eriocaulon

- Scientific name: Eriocaulon sp."Africa"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Africa
- Degree of difficulty: ★★★★★

Amami Oshima Eriocaulon

- Scientific name: Eriocaulon sp."Amami oshima"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: ★★★★★

Polaris fine grains

- Scientific name: Eriocaulon sp."An-son river"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: ★★★★★

Type II Eriocaulon pumilum Australia

- Scientific name: Eriocaulon sp."Australia II"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Australia
- Degree of difficulty: ★★★★★

Australia hematemesis Eriocaulon

- Scientific name: Eriocaulon sp."Australia-red"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Australia
- Degree of difficulty: ★★★★★

Type I Eriocaulon pumilum Australia

- Scientific name: Eriocaulon sp."Australia I"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Australia
- Degree of difficulty: ★★★★★

Bana Eriocaulon

- Scientific name: Eriocaulon sp."Ba na"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: ★★★★★

Mini Taco

- Scientific name: Eriocaulon sp."Bahia"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Brazil
- Degree of difficulty: ★★★★★

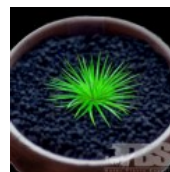

Bahia fine grains

- Scientific name: Eriocaulon sp."Bahia"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Brazil
- Degree of difficulty: ★★★★★

Thai Mini Eriocaulon

- Scientific name: Eriocaulon sp."Ban ba wa"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Thailand
- Degree of difficulty: ★★★★★

Bamba wang fine grain

- Scientific name: Eriocaulon sp."Ban ba wan"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Northeast of Thailand Sembawang class
- Degree of difficulty: ★★★★★

Bogor Eriocaulon

- Scientific name: Eriocaulon sp."Bogor"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Indonesia
- Degree of difficulty: ★★★★★

Calicut Eriocaulon

- Scientific name: Eriocaulon sp."Calicut"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: India
- Degree of difficulty: ★★★★★

Cambodia Eriocaulon

- Scientific name: Eriocaulon sp."Cambodia"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Cambodia
- Degree of difficulty: ★★★★★

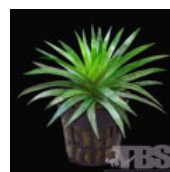

Dadouguing

- Scientific name: Eriocaulon sp."Dac doa"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: ★★★★★

Mo Valley Road, the first fine

- Scientific name: Eriocaulon sp."Dau so moi"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: ★★★★★

 Fukuchiyama fine valley

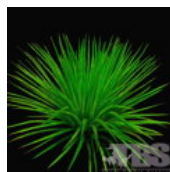

- Scientific name: Eriocaulon sp."Fukuchiyama"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 South America latifolia Otani fine (TACO)

- Scientific name: Eriocaulon sp."Goias"
- Department: fine grain growing woody Eriocaulaceae
- Origin: South America Brazil
- Degree of difficulty: 

 Guangzhou Eriocaulon

- Scientific name: Eriocaulon sp."Guangzhou"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Guangzhou, China
- Degree of difficulty: 

 Guangzhou latifolia Eriocaulon

- Scientific name: Eriocaulon sp."Guangzhou"(wide leaf)
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Guangzhou, China
- Degree of difficulty: 

 Guinea Eriocaulon

- Scientific name: Eriocaulon sp."Guinea"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Guinea
- Degree of difficulty: 

 Guinea 2006 Eriocaulon

- Scientific name: Eriocaulon sp."Guinea"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Guinea
- Degree of difficulty: 

 Hainan Island, fine grain

- Scientific name: Eriocaulon sp."Hainan island"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: China Hainan Island
- Degree of difficulty: 

 Hunan Eriocaulon

- Scientific name: Eriocaulon sp."Hunan"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: China Hunan
- Degree of difficulty: 

 Ruo valley should feel fine

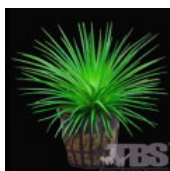

- Scientific name: Eriocaulon sp."Ia monong"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 Bai Gu Jing

- Scientific name: Eriocaulon sp."Ibaraki"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Ibaraki Eriocaulon

- Scientific name: Eriocaulon sp."Ibaraki"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Kanchanaburi Eriocaulon

- Scientific name: Eriocaulon sp."Kanchanaburi"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Thailand
- Degree of difficulty: 

 Kanu Eriocaulon

- Scientific name: Eriocaulon sp."Kannur"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: India
- Degree of difficulty: 

 Australia wide leaf Otani fine

- Scientific name: Eriocaulon sp."Kimberley"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Australia, Kimberley (Kimberley)
- Degree of difficulty: 

 Kumamoto Eriocaulon

- Scientific name: Eriocaulon sp."Kumamoto"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Barcelona Eriocaulon

- Scientific name: Eriocaulon sp."Laos pakxe"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Laos
- Degree of difficulty: 

 Mana Eriocaulon

- Scientific name: Eriocaulon sp."Mananthavady"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: India
- Degree of difficulty: 

 Mang Yang Eriocaulon

- Scientific name: Eriocaulon sp."Mang yang"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 South America Egeria Otani fine

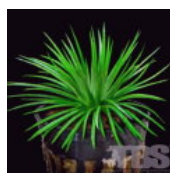

- Scientific name: Eriocaulon sp."Mato grosso"
- Department: fine grain growing woody Eriocaulaceae
- Origin: South America
- Degree of difficulty: 

 Miyazaki refined grains

- Scientific name: Eriocaulon sp."Miyazaki"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Name Harigaya fine

- Scientific name: Eriocaulon sp."Nabari"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Pa Luobo Eriocaulon

- Scientific name: Eriocaulon sp."Palopo"
- Department: fine grain growing woody Eriocaulaceae
- Origin: India Sulawesi Island
- Degree of difficulty: 

 Penang Eriocaulon

- Scientific name: Eriocaulon sp."Penang"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Malaysia
- Degree of difficulty: 

 Chevalier Eriocaulon

- Scientific name: Eriocaulon sp."Phu yen"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 Fu Jing Valley

- Scientific name: Eriocaulon sp."Phuoc son"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 Pakistan really fine Fugu

- Scientific name: Eriocaulon sp."Prajinburi"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Thailand
- Degree of difficulty: 

 Ratnagiri Eriocaulon

- Scientific name: Eriocaulon sp."Ratnagiri"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: India
- Degree of difficulty: 

 TACO II

- Scientific name: Eriocaulon sp."San francisco type II"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Brazil
- Degree of difficulty: 

 Small fine Yetai Yang

- Scientific name: Eriocaulon sp."Sao benedito"
- Department: fine grain growing woody Eriocaulaceae
- Origin: South America
- Degree of difficulty: 

 Shiga Eriocaulon

- Scientific name: Eriocaulon sp."Shiga"
- Department: fine grain growing woody Eriocaulaceae
- Origin: Shiga, Japan
- Degree of difficulty: 

 Shizuoka Eriocaulon

- Scientific name: Eriocaulon sp."Shizuoka"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Singapore refined grains

- Scientific name: Eriocaulon sp."Singapore"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Singapore or Malaysia
- Degree of difficulty: 

 Flame Eriocaulon

- Scientific name: Eriocaulon sp."Sulawes"(line leaf)
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 Sulawesi Eriocaulon

- Scientific name: Eriocaulon sp."Sulawesi"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 Fugu fine Suphan

- Scientific name: Eriocaulon sp."Suphanburi"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Thailand
- Degree of difficulty: 

 Thailand dwarf Eriocaulon

- Scientific name: Eriocaulon sp."Thailand dwarf"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Thailand
- Degree of difficulty: 

 Thailand Eriocaulon

- Scientific name: Eriocaulon sp."Thailand"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Thailand
- Degree of difficulty: 

 Wu Di Eriocaulon care

- Scientific name: Eriocaulon sp."Towuti"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Indonesia
- Degree of difficulty: 

 Vietnam Eriocaulon

- Scientific name: Eriocaulon sp."Vietnam"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 Song of the valley and fine

- Scientific name: Eriocaulon sp."Wakayama"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Japan
- Degree of difficulty: 

 Waya Nader Eriocaulon

- Scientific name: Eriocaulon sp."Wayanad"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: India
- Degree of difficulty: 

 Waya Nader fine grain type I

- Scientific name: Eriocaulon sp."Wayanad"(type I)
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: India
- Degree of difficulty: 

 Waya Nader red Eriocaulon

- Scientific name: Eriocaulon sp."Wayanad-red"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: India
- Degree of difficulty: 

 Ai-off Seya fine

- Scientific name: Eriocaulon sp."Xa lay"
- Department: fine grain growing woody Eriocaulaceae
- Country of Origin: Vietnam
- Degree of difficulty: 

 Japanese thermometer

- Scientific name: Eusteralis verticillata
- Department: Division Lamiaceae lip flower
- Origin: Japan, Korean Peninsula, China, Southeast Asia
- Degree of difficulty: 

 Japanese green shutters

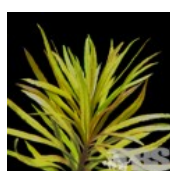

- Scientific name: Eusteralis yatabeana
- Department: Division Lamiaceae lip flower
- Origin: Japan, Southeast Asia, Australia
- Degree of difficulty: 

 Brazil, louver

- Scientific name: Eusteralis sp.
- Department: Division Lamiaceae lip flower
- Origin: South America Brazil Sao Francisco River
- Degree of difficulty: 

 Annan blinds

- Scientific name: Eusteralis sp."Annam"
- Department: Division Lamiaceae lip flower
- Origin: Asia Vietnam
- Degree of difficulty: 

 New grass blinds

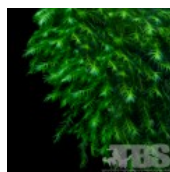

- Scientific name: Eusteralis sp. Cf. Stellata
- Department: Division Lamiaceae lip flower
- Origin: Australia, Asia area
- Degree of difficulty: 

 Fissidens moss thick handle

- Scientific name: Fissidens crassipes
- Department: Pteris Musci Fissidentaceae
- Country of Origin: China, Turkey, North Africa, Europe, Australia
- Degree of difficulty: 

 U.S. Fissidens moss

- Scientific name: Fissidens fontanus
- Department: Pteris Musci Fissidentaceae
- Origin: North America
- Degree of difficulty: 

 Small moss Fissidens

- Scientific name: Fissidens grandifrons brid var.planicaulis
- Department: Pteris Musci Fissidentaceae
- Origin: Japan, Taiwan
- Degree of difficulty: 

 Fissidens moss Japan

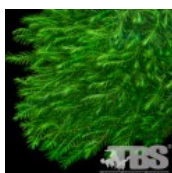

- Scientific name: Fissidens japonicus
- Department: Pteris Musci Fissidentaceae
- Origin: Japan, Taiwan, Philippines
- Degree of difficulty: 

 Large moss Fissidens

- Scientific name: Fissidens nobilis
- Department: Pteris Musci Fissidentaceae
- Origin: Russia's Far East, tropical - temperate Asia, and Oceania
- Degree of difficulty: 

 Warm moss Fissidens

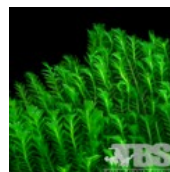

- Scientific name: Fissidens splachnobryoides
- Department: Pteris Musci Fissidentaceae
- Origin: Asia
- Degree of difficulty:

 Fissidens moss zipper

- Scientific name: Fissidens zippelianus
- Department: Pteris Musci Fissidentaceae
- Origin: Southeast Asia from Japan to
- Degree of difficulty:

 Singapore moss Fissidens

- Scientific name: Fissidens sp."Singapore"
- Department: Pteris Musci Fissidentaceae
- Country of Origin: Singapore
- Degree of difficulty:

 Large Jade Mosi

- Scientific Name: Fontinalis antipyretica var. Gigantea
- Department: Science or sphagnum moss Creek Branch Fontinalaceae
- Origin: Europe
- Degree of difficulty:

 Jade Mosi

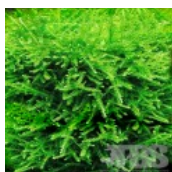

- Scientific Name: Fontinalis antipyretica
- Department: Science or sphagnum moss Creek Branch Fontinalaceae
- Origin: Southern Africa, the northern hemisphere's temperate zone
- Degree of difficulty:

 Soft sticks Mosi

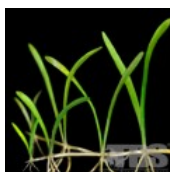

- Scientific Name: Fontinalis hypnoides
- Department: Science or sphagnum moss Creek Branch Fontinalaceae
- Origin: Europe, Japan, North America, South America, Africa, China, Xinjiang
- Degree of difficulty:

 New Jade Mosi

- Scientific Name: Fontinalis sp.
- Department: Science or sphagnum moss Creek Branch Fontinalaceae
- Origin: improved varieties
- Degree of difficulty:

 Leaf dwarf pearl spoon

- Scientific name: Glossostigma diandrum
- Department: Scrophulariaceae Scrophulariaceae
- Origin: Australia, Africa, India, Asia
- Degree of difficulty:

 Dwarf pearl

- Scientific name: Glossostigma elatinoides
- Department: Scrophulariaceae Scrophulariaceae
- Origin: South Australia, New Zealand
- Degree of difficulty:

 Octagonal water grass

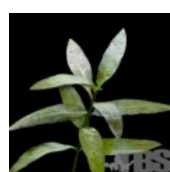

- Scientific name: Gratiola sp.
- Department: Scrophulariaceae Scrophulariaceae
- Origin: North America
- Degree of difficulty:

 Sri Lanka will be blue

- Scientific name: Gymnocoronis spilanthoides
- Department: Asteraceae Asteraceae
- Country of Origin: United States
- Degree of difficulty:

 Tea

- Scientific name: Gymnocoronis sp."Goias"
- Department: Asteraceae Asteraceae
- Origin: Brazil
- Degree of difficulty:

 Simon ear grass

- Scientific Name: Hedyotis salzmanni
- Department: Rubiaceae Rubiaceae
- Origin: Tropical Asia
- Degree of difficulty:

 Brazil ear grass

- Scientific Name: Hedyotis sp.
- Department: Rubiaceae Rubiaceae
- Origin: Brazil
- Degree of difficulty:

 Mini dwarf pearl

- Scientific name: Hemianthus callitrichoides"cupa"
- Department: Scrophulariaceae Scrophulariaceae
- Origin: Cuba
- Degree of difficulty:

 Pearl Grass

- Scientific name: Hemianthus glomeratum
- Department: Scrophulariaceae Scrophulariaceae
- Origin: Cuba, the southeastern United States

 Small bamboo

- Scientific name: Heteranthera zosterifolia
- Department: Division Pontederiaceae rain for a long time to spend
- Origin: Argentina, Brazil, Via Napoli, Paraguay

 South Asia different calyx moss

- Scientific name: Heteroscyphus zollingeri
- Department: Musci Heteroscyphus zollingeri calyx teeth
- Origin: South Asia
- Degree of difficulty:
